## Creditable Coverage Determination

October 1, 2018

Dear III-A Member,

According to the Simplified Determination of Creditable Coverage Status as set forth by CMS, a non-integrated prescription drug plan is deemed to be creditable if the plan:

- 1) Provides coverage for brand and generic prescriptions;
- 2) Provides reasonable access to retail providers;
- 3) The plan is designed to pay on average at least 60% of participants' prescription drug expenses; and
- 4) Satisfies at least one of the following:
  - A. The prescription drug coverage has no annual benefit maximum benefit or a maximum annual benefit payable by the plan of at least \$25,000, or
  - B. The prescription drug coverage has an actuarial expectation that the amount payable by the plan will be at least \$2,000 annually per Medicare eligible individual.

**Based on ProAct's administration of the III-A Rx Plan, the plan satisfies the requirements as outlined below:**

- 1) The plan provides coverage for brand and generic prescriptions;**
- 2) Prescriptions can be filled at a broad network of pharmacies;**
- 3) Based on claims the plan has paid on average, above 60% of participants' prescription drug expenses;**
- 4) The prescription drug coverage has no annual benefit max.**

Sincerely

Chris Laverty  
Account Executive  
ProAct, Inc.

*\*\*Keep this Creditable Coverage Notice. If you decide to join one of the Medicare drug plans, you may be required to provide a copy of this notice when you join to show whether or not you have maintained creditable coverage and, therefore, whether or not you are required to pay a higher premium (a penalty).*
